WORK EXPERIENCE

Frontend Software Engineer – Hook — *May 2022 – December 2022*

Creative frontend developer for an ad agency and digital production company with a focus on animations

- Worked with designers to build visually captivating web experiences using **Typescript**, **ReactJS**, **NextJS**, **Sanity**, and **GSAP** on the Hook website
- Implemented Google's version of an Instagram story ad using their custom tech stack (Amp, Kintaro, Bracket)

Frontend Software Engineer – Ghostery — *Sept 2019 – April 2021*

Frontend developer in a startup creating privacy tools including browser and system level ad-blockers

- Built animated graphs and themes for open source ad-blocking **browser extension** using **ReactJS**, **Redux**, **SCSS**, **D3.js**, **Jest**, and Golang
- Implemented the UI for tracking realtime network requests in the ad-blocking **electron app**
- Created a series of prompts to configure Ghostery Browser settings on first open

Software Engineer – DWM Comprehensive Facility Solutions — *Feb 2018 – June 2019*

Technical lead for all software projects company-wide regarding architectural design, development timeline, and system failure

- Maintained 5 **C# ASP.NET MVC web applications** that helped the company source work, record transactions, And automate tasks
- Designed and developed a React Native mobile app from scratch that handled the work order process for technicians from dispatch to billing
- Built **SMS & Phone services** using Twilio's API that helped technicians log time
- Mentored junior developers through pair programming and code reviews

EDUCATION

Stony Brook University — *September 2012 – May 2016*

B.S. in Computer Science
